

QUALITY POLICY

Paks II. Nuclear Power Plant Ltd. (hereinafter referred to as Company) a project company based in Paks, established for the management and implementation of the construction of the new Paks nuclear power plant units, as well as for obtaining the necessary preliminary permits for implementation of the investment and the operation of the new units. The Company undertakes all obligations and is committed to design, establish, operate, evaluate, and continuously improve the integrated management system which complies with the requirements in HAEA Decree No. 1/2022 (IV.29.) on the nuclear safety requirements of nuclear facilities and related regulatory activities. In this respect, the Company is committed to define those requirements which integrate the elements of safety, occupational health, environmental considerations, physical security, quality, society and economy. Taking into consideration the commitment for safety in all its activities in an appropriate manner is of special importance to the Company.

As for the management quality is equal with full compliance of legal obligations and with the continuous compliance of property and social expectations. Nuclear safety, environmental and sustainable functioning are handled as fundamental principles and these principles are taken into account during the preparatory and implementation works.

To fulfil this responsibility, the Company organizes and regulates its activity according to the relevant management, key, and support processes. The Company endeavors to apply the Integrated management system for permanent and scheduled development of the processes while ensuring full compliance with legal requirements. This effort, on the one hand, is consistent with the objectives of the person exercising the owner's rights; on the other hand, it facilitates to ensure occupational safety for the personnel concerned. Due to the Integrated management system the Company is capable of managing and implementing its activities by using different methods (program and project management, etc.) as well as it strives for the implementation of the relevant legal requirements.

During the implementation of the Quality Policy the employees' professionalism, responsibility, motivation, environmental awareness and commitment for safety are of the highest importance. Accordingly, providing an appropriate training and education for the employees the management endeavors to ensure and validate these values in the processes which allow the implementation of its basic activities. The management is also committed to make sure that each employee understands and accepts his/her role and responsibility in the operation of the Integrated management system and in the implementation of the quality policy.

In a first stage, the Company developed its Integrated management system in order to provide the preparatory actions for the establishment of the new units at Paks site but the management is also committed to a further improvement of the system in such a way that it follows each operating stage and feature of the Company.

The Company requires from all employees and suppliers of the project to contribute to the successful operation and continuous improvement of the Integrated management system, as well as to the quality approach development.

Paks, 29. August 2022
